

BEEF - GrassFed Pellet

We are proud to be a part of growing regional Western Australia and value your support.

Patmore Feeds' GrassFed Pellet is a highly palatable 9mm pellet specifically designed to be fed to Pasture Grazed Cattle as a supplement during drought or dry conditions and where there is a lack of pasture and risk of nutritional stress. As a 9mm pellet, Patmore Feeds' Grass fed Pellet is ideal for feeding in the paddock with available pasture, or mixed with additional roughage such as hay or silage for feeding in bunks or feeders. This pellet contains no cereal grains or cereal grain by-products, it contains no rumen modifiers or antibiotics and has no withholding period. It does contain a nutritionally balanced range of minerals & vitamins, as well as the required protein and energy to assist in keeping cattle in prime condition.

TYPICAL ANALYSIS Dry Matter Basis
