

DAIRY - Winter Lactation Pellet

We are proud to be a part of growing regional Western Australia and value your support.

Patmore Feeds' Winter Lactation ration is a highly palatable 6mm pellet formulated for lactating dairy cows grazing on high quality pastures during the wetter and cooler months in Western Australia.

This product has added Acid buf to maintain rumen pH and enhance rumen health. It has a balanced supply of minerals, trace elements and vitamins to help maintain the health and well-being of the cow. Feeding rates vary according to forage availability and quality.
