

# BEEF All Rounder Pellet

We are proud to be a part of growing regional Western Australia and value your support.

**Patmore Feeds' Beef ARP** is a highly palatable 9mm pellet specifically designed to be fed to all classes of cattle including feedlot cattle, cows pre-calving, young bulls prior to sale, summer/autumn feeding and growing out heifers to joining weight.

As a 9mm pellet, Beef ARP is ideal feeding through feeders in the paddock. This pellet contains Rumensin to aid in improved feed conversion and reduce the risk of acidosis.

Note: If using in a feedlot it is recommended to feed good quality straw or hay ad-lib.

## TYPICAL ANALYSIS Dry Matter Basis

Nutrient	Level
Energy (Ruminant ME)	11.0 MJ ME/kg
