

BEEF - The Weaner Pellet

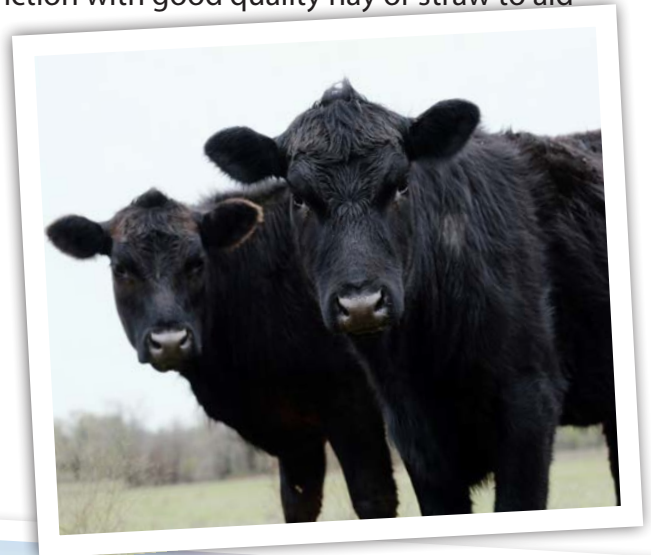

- 9mm Pellet made from locally sourced ingredients and designed for local conditions
- Formulated for young, growing cattle from weaning to 12 months of age.
- Designed to enhance rumen development and stimulate growth in early weaned calves & heifers.
- Highly digestible for improved live weight gains
- Ideal for backgrounding young cattle prior to feedlot entry.

This pellet contains rumen buffer to reduce the risk of digestive upsets & Rumensin to aid in prevention of coccidiosis & improve feed conversion.

This product can be fed at a rate of 1-2% of live weight in conjunction with good quality hay or straw to aid in rumen health.
